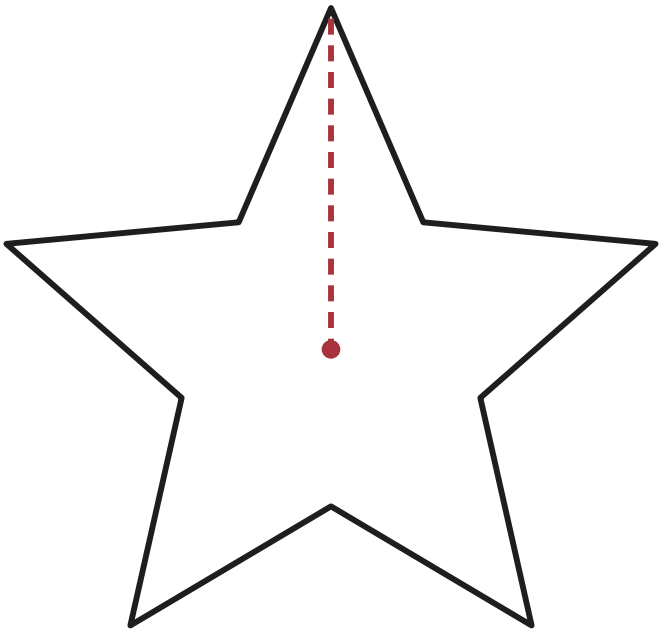
DAY 11

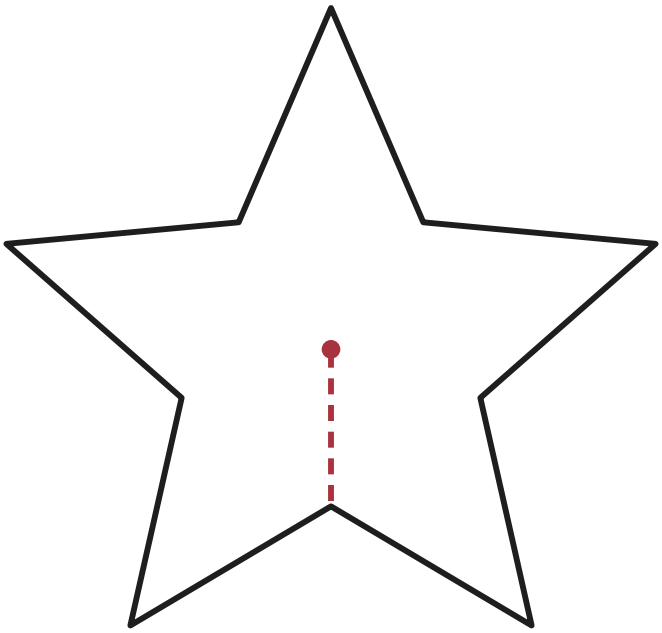
Make a Paper Star for Little Tree

DEC 23

Color both stars, cut them out, and slide them together to make a standing 3-D star. Ask a grown-up to help with the scissors.



Star A: cut slit from the top point to the dot



Star B: cut slit from the bottom notch to the dot

How to make your star

✂ **Grown-up help**

1. Color both stars on this side. Add stripes, dots, or hearts if you like!
2. Cut out each star on the solid black line.
3. Cut the red dashed slit on each star, stopping at the red dot.
4. Slide the slit of Star B down into the slit of Star A, so the stars cross.
5. Stand your star on a table, or tape a ribbon loop to the top to hang it.
